Summary

DevOps and Site Reliability Engineer with **3+ years** spanning database engineering and DevOps/SRE, including **nearly 3 years** focused on DevOps/SRE. Cut multi-platform release build time from **2 hours to 15 minutes**; operate Docker and Kubernetes workloads at **99.9%+ availability** across AWS, GCP, and DigitalOcean using Terraform IaC, GitOps (ArgoCD), and Prometheus/Grafana observability. **Immediate joiner** — no notice period.

Experience

DevOps Engineer, Colligence Research Private Limited — Bengaluru, India Nov 2023 – Jul 2026
Internal transfer from sister company Appsndevices Technologies

Project: Circle — Multi-Platform Product Delivery

- Built multi-platform CI/CD pipelines in **GitHub Actions** shipping daily releases to Android, iOS, Windows, and macOS from a single codebase, cutting build time from **2 hours to 15 minutes** per platform.
- Automated code signing, artifact validation, and staged release promotion using **blue-green and canary** rollouts for a team of **10+ engineers**, eliminating manual release errors.
- Implemented **Prometheus/Grafana** alerting, centralized log aggregation with **Loki**, and SLO tracking, reducing mean time to detect (MTTD); carried production on-call and led root cause analysis (RCA) for incidents.
- Built custom **Claude Code** agents for CI-failure triage, deploy/rollback, log analysis, and secrets auditing, measurably reducing release and incident-response toil.

Project: Aikyat Platform

- Provisioned infrastructure across **three cloud providers** (AWS, GCP, DigitalOcean) as version-controlled Infrastructure as Code using **Terraform, Pulumi, and Ansible**.
- Operated **Docker/Kubernetes** workloads at **99.9%+ availability**; managed secrets with **Infisical** and **Google Secret Manager**, enforcing least-privilege **IAM/RBAC** across all cloud accounts.

Database Engineer, Appsndevices Technologies Private Limited — Bengaluru, India Nov 2022 – Nov 2023

- Administered production **PostgreSQL**: streaming replication, automated backups with tested restores, and performance tuning for high availability.
- Engineered **Apache Kafka** event-streaming and log-aggregation pipelines feeding **BigQuery** analytics.

Projects

Production Kubernetes Platform — karthikhegde.in · github.com/KarthikHegde91/infra

Designed, built, and operate a complete production platform on free-tier infrastructure at zero recurring cost: **K3s** on Oracle Cloud ARM, **ArgoCD** GitOps, **Terraform** IaC, Prometheus + VictoriaMetrics + Grafana observability, Uptime Kuma, and Cloudflare Tunnel (Zero Trust) ingress. Accelerated IaC and manifest authoring using Claude Code agents; architecture, review, testing, and production operation my own.

Technical Skills

Containers & Orchestration: Kubernetes (K8s), K3s, Docker, ArgoCD, GitOps

Infrastructure as Code: Terraform, Pulumi, Ansible

CI/CD & Release: GitHub Actions, Jenkins, Fastlane, Shorebird, blue-green deployments, canary releases

Cloud Platforms: AWS (EC2, S3, IAM, VPC, Lambda), GCP (Compute Engine, BigQuery), Oracle Cloud, DigitalOcean, Cloudflare; cost optimization (FinOps)

Observability & Reliability: Prometheus, Grafana, Loki, VictoriaMetrics, CloudWatch, log aggregation, SLOs, alerting, on-call, incident management, RCA

Databases & Streaming: PostgreSQL, Apache Kafka, Redis, BigQuery, event streaming

Languages & Scripting: Python, Bash, PowerShell, Linux (Ubuntu, RHEL), Git

Networking & Security: NGINX, DNS, SSL/TLS (Let's Encrypt), Cloudflare Tunnel (Zero Trust), Infisical, Google Secret Manager, IAM/RBAC, secrets management

AI & Agentic Engineering: Claude Code (custom agents and skills), AI-assisted development, agentic workflows with human review gates

Education & Certifications

Master of Computer Applications (MCA), B.M.S College of Engineering, Bengaluru 2020 – 2022

Bachelor of Computer Applications (BCA), KLE Society's Nijalingappa College, Bengaluru 2017 – 2020

Docker Certified Associate (DCA) — in progress
